Vadstena

Swedish historical grounds

The International Saab Club Meeting 2016 is set to a very beautiful and yet historical important place in Sweden called Vadstena.

It's located between Stockholm and Gothenburg by the second biggest lake in Sweden, Vättern. In the town, you will find paved cobblestone alleys with lovely wooden traditional houses in different colours, medieval surroundings, Vadstena Castle and Saint Birgitta's monastery.

The medieval town of Vadstena with all its attractions and historical memories, Lake Vättern's clean blue water and beautiful natural surroundings greet you.

Linköping

High technological capital

If Baron Cederströms air show at Malmen in 1911 was the start of Linköping aviation history then the establishment of Saab more than 70 years ago was the starting point for the development of a city with high tech world class expertise.

Linköping is the home of Saab Aerospace since the beginning in 1939. Saab are in many cases leading within aerospace and defence system and has been an engine in Swedish technology development. Today Saab employs about 4,700 people in Linköping and a lot more across the country.

Discover Linköping, located on the stunning Östgöta plains in the province of Östergötland. There's a lot to see and do here year-round!

The Air Force Museum, the open-air museum of Old Linköping, the Linköping Cathedral and the Berg locks are just few examples of all the sights of our fair city.

15°39'24.1"E

The first Saab car - Ursaab - which is now the center of attention at the Saab Museum in Trollhättan was developed here at the factory in Linköping. Later on the early Saab 95 cars were assembled here.

You have probably seen a beautiful wooden steering wheel in a Saab Sport sometime. That too was made here.

Made in Linköping
